

*St. Rose of Lima is
moving into the Technology Era!!!!*

With our recent changeover to the ConnectNow Family Directory database, we can offer our church members access anytime and anywhere to their own church records from any Web-enabled device (smartphone, tablet, or computer) as long as an Internet connection is available.

Advantages for YOU, the Parish Members

My Own Church is the ideal solution for members who use the Internet to manage their personal finances and business. My Own Church uses ParishSOFT's technology to give members secure and personal access to the information in their family and member records. Registered users of ConnectNow Family Suite can log in and perform any of the following tasks in My Own Church:

- Manage their own church records and keep personal information accurate and up to date. For example, members who move or change phone numbers can quickly and easily log in and update this information for themselves. No need to call the church, fill out and submit paper forms, and then wait for someone at the church to update their records.
- Add a record for a new family member.
- View their personal giving history and print out a tax statement whenever you need it.
- Upload a family photo and individual photos of individual family members.
- Check their ministry schedules and the schedules of individual family members.

Web-savvy members gain the freedom to update their information at any time—all without paper forms or phone calls to the parish office. Changes are processed electronically and without the delays typically experienced from the processing of paper forms. Note that any changes a member makes to his or her record must first be approved by an authorized church administrator so there may be a short delay in getting a record updated.

Advantages for US, the Church Staff

Changes to family and member information can be processed electronically and without the delay inherent to a paper form update process. With its complete integration with ParishSOFT's ConnectNow Family Directory module, any changes or new records that we accept on the My Own Church website are saved to our single database, so we can always have access to the most current census information—no matter which application we use to log in.

To access the data base, please use this link, or go to our website and click on the ConnectNow icon to be taken to the page and follow the directions given.
